

## **FIRST ANNOUNCEMENT**

### **2. Scandinavian Winfocus Meeting October 19<sup>th</sup> - 21<sup>th</sup> 2009**

*The emerging pervasive role of UltraSound in the management of Airway,  
Breathing, Circulation and Dolour in the ill or injured patient*

**At the Aarhus University Hospital, Skejby, Denmark.**

**On-line registration and programme available March 1 st 2009**

*[www.usabcd.org](http://www.usabcd.org)*

**Theory – Workshops – Volunteers – Eksperimental models**

Diagnostic and interventional ultrasound has only recently become established in anaesthesia, intensive care and emergency medicine. This 2<sup>nd</sup> Scandinavian meeting will elucidate the emerging pervasive role of ultrasound in the ill and injured patient – prehospital, in the emergency room, the operating theatre and the intensive care unit by presenting current concepts and future trends of the UltraSound of ABCD.

**Med venlig hilsen**
